

# Yijie Yang

MSc in Geospatial & Mapping Sciences

Email: 3153690Y@student.gla.ac.uk | GitHub: github.com/zak-yyj

## Education

MSc in Geospatial & Mapping Sciences

University of Glasgow, UK | 2025 – 2026

- Focus on cartographic theory, map projection, and spatial accuracy assessment

BSc in Geographic Information Science

Nanjing Xiaozhuang University, China | 2020 – 2024

- Bachelor's thesis: Study on Surface Temperature Retrieval of Greenland Glaciers Based on Satellite Remote Sensing

## Research Interests

- Quantitative evaluation of mapping accuracy across multiple remote sensing methods
- Cartographic projection distortion analysis and uncertainty propagation
- GeoAI research
- Integration of multi-source satellite data for geospatial accuracy assessment

## Research Experience

Bachelor's Thesis: Study on Surface Temperature Retrieval of Greenland Glaciers Based on Satellite Remote Sensing

Nanjing Xiaozhuang University | 2023 – 2024

- Conducted surface temperature inversion over Greenland glaciers using satellite remote sensing data
- Pre-processed and analysed multi-temporal satellite imagery (e.g. Landsat)
- Applied physical and empirical inversion models to estimate glacier surface temperature
- Assessed spatial and temporal variability of temperature patterns in high-latitude environments
- Discussed uncertainty sources related to sensor characteristics and atmospheric effects

## Technical Skills

Cartography & GIS: ArcGIS, QGIS, map projection analysis

Remote Sensing: Landsat, Sentinel data processing, temperature inversion

Programming: Python (NumPy, Matplotlib), MATLAB

## **Publications & Presentations**
